- Auditcon 2 Series Software includes: CD-ROM, cable, key reader, adapter (serial or USB) and Smart Key
- Auditcon 2 Series Software upgrade available for Audit Only users

## Auditcon 2 Series Software

### Description

To see which users have been added and what activity has occurred at the lock, the Auditcon 2 Series Software must be utilized. You can also upload information from the PC software to the lock. Uploadable data includes lock setup options, lock users, and time windows. This function can help save time, particularly when programming several locks with similar information. All communication between the software and the lock occurs by using a programmed Smart Key. This software also allows the use of a USB connector (ordered separately) for your existing 2-port key reader in the event the PC does not have an available serial port.

### Compatibility

Compatible with the following Microsoft operating systems:

- Windows XP Professional (service pack 1 or greater)
- Windows 2000 Professional (service pack 2 or greater)
- Windows 98 SE (Second Edition)

### Functions

- Program Lock Setup Options: Models 252/552
- Upload Lock Time/Date: Model 552 (Teal B Smart Key required, p/n 202023 ordered separately)
- Add/Delete Users: Models 252/552 (Figure 1)
- Upload Time Windows: Model 552
- Download Audit Reports: Models 252/552 (Figure 2)
